

AI Store - Product Description

Project Overview:-

The AI Store is a Marketplace that is a curated, SEO-optimized web directory designed to simplify AI discovery. It bridges the gap between tool availability and user proficiency by not only categorizing modern AI tools (writing, coding, image generation, etc.) but also providing critical usage data, prompt engineering tutorials, and cost-optimization strategies.

Core Features & User Flow :-

- **Categorized Directory:** Structured browsing by use-case (e.g., Productivity, Research, Video Generation).
- **Dynamic Leaderboard:** An algorithmic or manually curated ranking system evaluating tools on capability, cost-efficiency, speed, and user feedback.
- **Deep-Dive Detail Pages:** Individual tool profiles featuring:
 - Overview and Pricing (Freemium, Subscription, Pay-per-API-call).
 - Usage Limitations and Context Windows.
 - Prompt Engineering Tips & Token Optimization Strategies.
- **Advanced Search & Filtering:** Ability to sort by ranking, price model, or specific technical capabilities.
- **Tutorial Library:** Step-by-step guides for maximizing tool efficiency.
- **Admin Dashboard:** A secure internal portal for managing listings, updating rankings, and publishing tutorials.

Tech Stack:-

- **Frontend:** HTML, CSS, React (JSX), Tailwind, Next.js
- **Backend:** Node.js
- **Database:** PostgreSQL (with SQL for querying)
- **Backend Services / Auth:** Supabase
- **Languages / Formats:** TypeScript, Markdown/MDX (for tutorials)
- **Deployment:** Vercel (Frontend) and Supabase/Render (Backend/Database)
- **Version Control:** GitHub

Deliverables

- Fully responsive web platform.
- Secure Admin Management System.
- Complete source code repository with documentation.
- Live deployed application.
- Setup and architecture documentation.
